Bud Industries Per- and polyfluoroalkyl substances (PFAS) declaration

DATE: AUG 2024

TO: WHOM IT MAY CONCERN

Per- and polyfluoroalkyl substances (PFAS) are a large, complex group of synthetic chemicals which has been used widely to make fluoropolymer or fluorinated coatings and retardant application in products. PFAS also known as 'forever chemicals' as these chemicals are extremely persistent and high risk to the environment and human health, therefore certain country's regulations are required to report the usage of PFAS substances in products.

We confirm to the best of our knowledge that the components and/or materials supplied By Bud do not contain per-and polyfluoroalkyl substances (PFAS) as currently [listed by the EPA](#).

A handwritten signature in black ink that reads 'Arie Maayan'.

Arie Maayan
Director of Engineering
